

Name of Workshop | Setting Standards and Reporting Results

Course Information

This workshop is intended for those who have a basic knowledge of psychometric principles. It will cover the essential steps involved in setting standards for an assessment and a review of commonly-used methods.

Hands-on experience in the standard-setting process will also be provided for the modified Angoff method. Considerations in evaluating the validity of standard setting results will also be reviewed.

Course Outline

1. Standard setting overview

- Fundamental concepts
- Required steps for all standard setting methods
- Types of methods

2. Development of performance level descriptors and definitions of borderline examinees

3. Modified Angoff method

- Training on task
- Provision of ratings
- Feedback
- Debriefing on method

4. Evaluating validity of standard setting results

Who | should attend

This workshop will be a great opportunity for practitioners, educators, researchers and students who would like to increase their understanding and ability to implement different ways to set cut scores and establish performance standards for different levels of knowledge, skills, and abilities.

Participants will also learn about the steps common to judgmental standard setting procedures and different approaches to evaluating the validity of each of the procedures.
